Smart Process & Control LTD

Smart Process & Control Ltd manufacture a comprehensive range of Electricity Meters and Multifunction Power Monitors, specialising in MID Approved Measuring devices. Our product range covers the requirements of basic kWh Meters to a programmable Multifunction Meter with additional parameters allowing end users to analyse their consumption in detail. We have ongoing development projects for general Metering requirements and also work closely with some of the largest UK Switchgear and Switchboard Manufacturers, as well as UK utility companies to offer specific product design for their needs.

We operate from a UK-based office with a Remote Production facility. At our UK-based office we run many different procedures, including a full QA department ensuring the quality of our products. We also focus strongly on Sales & Marketing, Research & Development, Customer Service and Order Completion from stock, achieving a next-day turnaround. With over 20 years of experience in the metering industry, we pride ourselves on the agility of our company and service we offer, whilst remaining competitive and innovative.

To ensure quality and conformity, our business has obtained an ISO 9001 certification.

In line with recent changes and legislation with regards to the Measuring Instrument Directive which will be effective as of 2016 it has been our main aim to manufacture a full range of MID products at a price level that will enable the consumer to use in any application regardless of whether the meter is being used for billing or non billing applications. It is peace of mind and future proof. We are the smart choice for your metering needs.

RS Components (Global Distribution)

For the last 75 years, RS Components have been serving engineers and procurement specialists with an extensive range of electrical components available from stock for a next day delivery. We are pleased to be the designated manufacturer in charge of development & own-branding the collection of Digital Power Meters for RS Components. Our flexibility as a company was complimented by our ability to offer a quick and effective solution to a gap in the RS Product Range. With a client base of over 1 million customers across 80 countries, we look forward to the continuous improvement of our working relationship.

Havells Switchgear

Havells is a global manufacturer of Electrical and Power Distribution equipment, with a focus on industrial and domestic circuit protection, switchgear, cables & wires, motors, fans, power capacitors, CFL lamps and luminaires for domestic, commercial & industrial applications. We have a successful relationship with regards to supplying them metering solutions and developing new products. We enjoy working with their Engineering team to ensure we are not only offering them metering products but providing new solutions which cover ease of installation, simplistic use and cost effectiveness.

UK Power Networks

UK Power Networks own and maintain electricity cables and lines across London, the South East and East of England. We are pleased to have worked with their Technical Engineering team to develop a bespoke Power Meter for distribution monitoring and automation. The meter has been designed around their specific requirements whilst remaining commercially viable. We have also worked with 3rd parties involved in this project to insure the success of the roll out.

SMARTAIL X Series

SMARTAIL X45A-MID

Dinrail (1 Module) Mounted
Single Phase (1P2W) Networks
230V AC / 50Hz
45A AC Direct Connected
1000IMP/kWh Pulsed Output
Reads kWh (999999.9)
Class B Accuracy
Analogue Display
MID B&D Approved

SMARTAIL X45DB-MID

Dinrail (1 Module) Mounted
Single Phase (1P2W) Networks
230V AC / 50Hz
45A AC Direct Connected
1000IMP/kWh Pulsed Output
Reads kWh (999999.9)
Class B Accuracy
Digital Backlit Display
MID B&D Approved

SMARTAIL X45M-MID

Dinrail (1 Module) Mounted
Single Phase (1P2W) Networks
230V AC / 50Hz
45A AC Direct Connected
Dual Pulse & Modbus Outputs
Multifunction (V, A, kW, kVA, PF, Hz, kWh)
Class B Accuracy
Digital Backlit Display
MID B&D Approved

SMARTAIL XCTM-MID

Dinrail (1 Module) Mounted
Single Phase (1P2W) Networks
230V AC / 50Hz
100mV AC CT Operated
Dual Pulse & Modbus Outputs
Multifunction (V, A, kW, kVA, PF, Hz, kWh)
Class B Accuracy
Digital Backlit Display
MID B&D Approved

SMARTAIL X100 MID Series

Dinrail (2 Module) Mounted
 Single Phase (1P2W) Networks
 230V AC / 50Hz
 100A AC Direct Connected
 Class B Accuracy
 Digital Backlit Display
 MID B&D Approved
 Basic & Advanced Models
 Pulsed Output (SR X100B-MID)
 Dual Pulsed Output (SR X100-MID)
 RS485 Modbus RTU Output (SR X100-MID)

Split Core CT Series

Split Core CT Series

Frequency: 50-60Hz
 Accuracy: $\pm 1\%$ between 20% - 120%
 Insulation voltage: 600V AC
 Maximum primary voltage: 5000V AC
 Dielectric strength: 2.5KV/1mA/1min
 Operating temperature: -15°C to $+60^{\circ}\text{C}$
 Operating humidity: $<85\%$
 Case material: PC / UL94-V0
 Bobbin: PBT
 Core: Permalloy
 Internal structure: Epoxy

SMARTRAIL SDL Series

SMARTRAIL Sigfox Datalogger

Dinrail (1 Module) Mounted
Wireless Data Transfer
SIGFOX™ Network Connectivity
Remote Monitoring Solution
Minimal Data Charges
No Software / Licence Fees
Pulsed Inputs
RS485 Modbus RTU Input

The SMARTRAIL-SDL Datalogger is a low-cost solution for remotely monitoring Smart Process digital power meters equipped with Modbus RS485 RTU.

This device utilizes the SIGFOX™ network to transfer data wirelessly from meter to the cloud. This data can be presented using our software, or if preferred, it can be provided in a raw format such as a CSV file allowing you to present the data through your own software.

SIGFOX™ is a leading cellular network dedicated to low-bandwidth communications for connected devices. Its technology is particularly suited to connecting objects requiring a low-cost data transfer. This technology also eradicates the requirement for a SIM card.

The SMARTRAIL-SDL is specifically designed to enable a simple, low cost, remote wireless management solution that does not require specialist technical skills for installation.

The SMARTRAIL-SDL can take up to 3 parameter inputs through Modbus RS485 from the following list:

- Total Active Energy (Σ kWh)
- Import Active Energy (kWh)
- Export Active Energy (kWh)
- Current (A)
- Voltage (V)
- Instantaneous Power (kW)
- Power Factor (PF)
- Frequency (Hz)

This can be 3 parameters from 1 meter, or 1 parameter per meter from 3 meters.

The SMARTRAIL-SDL also has the facility to take 2 pulsed inputs for legacy meters such as water, gas or electricity meters that do not have Modbus RS485 communications.

Examples of Monitoring Setups

Below are some examples of how the SMARTAIL-SDL can be wired in conjunction with other meters to read parameters accordingly:

1 Electricity Meter - 3 Parameters

Parameters:

Meter 1: Total Active Energy (Σ kWh)

Meter 1: Import Active Energy (kWh)

Meter 1: Export Active Energy (kWh)

3 Electricity Meters - 1 Parameter Per Meter

Parameters:

Meter 1: Total Active Energy (Σ kWh)

Meter 2: Total Active Energy (Σ kWh)

Meter 3: Total Active Energy (Σ kWh)

1 Water Meter, 1 Gas Meter, Electricity Meter

Parameters:

Water Meter: 1 Pulsed Input

Gas Meter: 1 Pulsed Input

Power Meter: Total Active Energy (Σ kWh)
